A clubhouse would help encourage community engagement/involvement, generate money for our community through charging for reasonable rental rates, higher non-resident user fees, and clean-up fees, and would increase each home's value and desirability.

A committee is being formed to determine what kind of clubhouse to propose to the CDD Board, then potentially approve and budget for. The committee is in search of at least one person from each Phase of Highland Meadows 2 to join. Our goal will be figuring how to best suit the needs and wants of the community regarding the center while ensuring the likely increase to fees is reasonable to currently take on.
